

Why Scientist Co-Development Is Necessary Now

TRANSITION AFTER DECK 1

- The current platform already includes a public route, administration observability, an explainable baseline, and governance surfaces.
- The science gap is also real: weak layers, regional transfer, qualification, and promotion evidence are unfinished.
- That gap is exactly where the scientist team becomes central rather than decorative.

READY NOW

Decision-support platform

Public-facing platform shell and operational evidence surfaces already exist.

NOT READY NOW

Scientific closure

The next phase is about benchmark and validation ownership, not about declaring victory.
